RoomBooker Overview

- **How to Run**

- Download RoomBooker.jar

    - It is an executable Jar file

- Download RoomBooker.mv.db

    - This is the database

- Copy RoomBooker.mv.db to your Home directory

    - ie **cp ~/Downloads/RoomBooker.mv.db ~/**

- You must have Java 8 installed

- Double-click on RoomBooker.jar to run

- If you don't copy the database, a new empty database will be created.
